EEA geospatial data catalogue

European Image Mosaic

European Image Mosaic provides a seamless pan-European ortho-rectified mosaic processed from individual satellite image scenes.

European Image Mosaic has a three years update cycle and in high resolution is available for the 2006, 2009, 2012, 2015 and 2018 reference years. In very high resolution European image mosaic is available only for the 2012 and 2018 reference years (due to data availability and quality issues).

The European Image Mosaic product suite is part of the European Union's Copernicus Land Monitoring Service.
