

European Union Emissions Trading System (EU ETS) data from EUTL, April 2023

Data about the EU emission trading system (ETS). The EU ETS data viewer provides aggregated data on emissions and allowances, by country, sector and year. The data mainly comes from the EU Transaction Log (EUTL). Additional information on auctioning and scope corrections is included.

Statement	<p>See EU ETS data viewer manual (under direct download/documents) for methodology.</p> <p>This data set is mainly based on data extracted from the European Union Transaction Log (EUTL) on 1st April 2023. The EUTL checks and records all transactions taking place within the trading system.</p> <p>It is run by the European Commission. See: https://ec.europa.eu/clima/ets/ (https://ec.europa.eu/clima/ets/). The data set also includes information on auctions of allowances, compiled from auctioning platforms, as well as EEA estimates of ETS emissions for the period 2005 to 2012, to reflect the current scope of the ETS for the third trading period (2013–2020).</p>
