

## Copernicus EEA39 Border Expert product (raster 20m), version 3, Jan. 2019

For the provision of land monitoring services within COPERNICUS, a consistent, stable, sufficiently detailed boundary layer is required at EEA, which provides a "land mask" for the area that needs to be monitored. This metadata refers to the Border Expert product covering EEA38 and the United Kingdom (former EEA39) in raster format (TIFF) at 10m resolution. The Border Expert product is an intermediate product for which copyright restrictions apply, as in this product ungeneralised data from EuroGeographics EuroBoundary Map Version 12 is included. Use of this dataset has therefore to be agreed with EEA / EuroGeographics. The boundary layer is further derived from the EU-Hydro Coastline Version 3 from EEA, the EEA coastline for analysis Version 2, the EBM GISCO Hybrid Layer from EEA, the "Water and Wetness High Resolution Layer 2015" from EEA and the JRC-Global Surface Water Occurrence layer. The production of this EEA39 Border Expert Product was coordinated by the European Environment Agency in the frame of the EU Copernicus programme.

The production of this Border Expert Product was coordinated by the European Environment Agency in the frame of the EU Copernicus programme.

IMPORTANT NOTE: This dataset is only available for internal use within EEA in the context of the EU Copernicus programme. Copyright restrictions apply, as in this product ungeneralised data from EuroGeographics EuroBoundary Map Version 12 is included. Use of this dataset has therefore to be agreed with EEA and ultimately with EuroGeographics.
