

Copernicus EEA39 Border Expert product (raster 100m), version 3, Jan. 2019

For the provision of land monitoring services within the Copernicus programme, a consistent, stable, sufficiently detailed boundary layer is required at EEA, which provides a "land mask" for the area that needs to be monitored.

This metadata refers to the Border Expert product covering EEA38 and the United Kingdom (former EEA39) in raster format (TIFF) at 100m resolution, including the French DOM (Saint-Barthelemy BL, Saint Martin MF, French Guiana GF, Guadeloupe GP, Martinique MQ, Mayotte YT and Reunion RE) as well as the Falkland Islands (FK).

This dataset derived from a rasterisation of the Border Expert vector product, which is based on the EU-Hydro Coastline Version 3 from EEA, the EEA coastline for analysis Version 2, the EBM GISCO Hybrid Layer from EEA, the "Water and Wetness High Resolution Layer 2015" from EEA and the JRC-Global Surface Water Occurrence layer.

The production of this Border Expert Product was coordinated by the European Environment Agency in the frame of the EU Copernicus programme.

IMPORTANT NOTE: This dataset is only available for internal use within EEA in the context of the EU Copernicus programme. Copyright restrictions apply, as in this product ungeneralised data from EuroGeographics EuroBoundary Map Version 12 is included. Use of this dataset has therefore to be agreed with EEA and ultimately with EuroGeographics.
