

Urban Waste Water Treatment Directive, Agglomerations reported under UWWTD data call 2019 - PUBLIC VERSION, Nov. 2020

UWWTD Agglomerations, Nov. 2020 is one of the datasets produced within the frame of the reporting under 11th UWWTD Art.15 reporting period (UWWTD data call 2019).

The Urban Waste Water Treatment Directive (UWWTD) (91/271/EEC) obliges Member States to report data on the implementation of the Directive upon request from the European Commission bi-annually. Reported data include receiving areas as designated under UWWTD, agglomerations, urban waste water treatment plants serving the agglomerations and points of discharges.

Dataset UWWTD_Agglomerations contains agglomerations reported by countries with generated load 2000 p.e. (or even smaller), including names, coordinates, generated load and information whether the load generated is collected through collecting system or addressed via Individual Appropriate Systems (IAS) or not collected not addressed via IAS.

This dataset includes the reported agglomerations which are displayed on the UWWTD maps (<https://www.eea.europa.eu/themes/water/european-waters/water-use-and-environmental-pressures/uwwtd/interactive-maps/urban-waste-water-treatment-maps-3>). The active agglomerations with correct coordinates in the reported data were selected from the source European UWWTD tabular dataset, which is available on the download link <https://www.eea.europa.eu/data-and-maps/data/waterbase-uwwtd-urban-waste-water-treatment-directive-7>. The internal dataset which includes the inactive agglomerations as well is available under "Urban Waste Water Treatment Directive, Agglomerations reported under UWWTD data call 2019 - INTERNAL VERSION, Nov. 2020".

Conformance result

Date (Publication)	2010-12-08
Explanation	See the referenced specification

Statement	Agglomerations data were reported by Member states in tabular format. Spatial position of individual agglomerations was specified by the geographical coordinates fields (longitude, latitude). These tabular data were checked, grouped into a common Pan-European dataset and transformed to the spatial data layer in GIS software. Inactive agglomerations and agglomerations without coordinates or with obviously wrong coordinates were removed.
