

## Air Quality Zones and Agglomerations reported under the Ambient Air Quality Directives (reported since 2013)

The dataset described here presents the geometries of the zones and agglomerations reported since 2013 by Member States in compliance with the Ambient Air Quality Directives and successfully validated by the EEA's Quality Control system.

In accordance with the procedure referred to in Article 5 of 2011/850/EU on the reciprocal exchange of information and reporting on ambient air quality, Member States shall make available the information set out in Part B of Annex II to this Decision on the delimitation and type of zones and agglomerations established in accordance with Article 3 of Directive 2004/107/EC and Article 4 of Directive 2008/50/EC and in which the assessment and management of air quality is carried out.

....

These data flows are described on Reportnet's ROD (Reporting Obligation Database): <https://rod.eionet.europa.eu/obligations/670> and <https://rod.eionet.europa.eu/obligations/693>.

More meta-information on zones, including data providers can be found at <http://aideb.apps.eea.europa.eu>

The second case is used for minor updates such as e.g. alignment with improved administrative boundaries. Information on errors found in data is also stored in SQL tables and serves as source for feedback reports to reporting countries (based on Tableau dashboards).
