

## Climate change mitigation policies and measures (greenhouse gas emissions)

This database contains a number of climate change mitigation policies and measures (PaM) implemented, adopted or planned by European countries to reduce greenhouse gas emissions. These PaMs have been officially reported and quality checked by the EEA. There is detailed information for each of the PaMs (or groups of PaMs). Countries report main characteristics of the PaMs, such as their description, objective, type, status, sectors affected, related Union Policy, entities responsible for their implementation, implementation period, etc. Where available, quantitative information on the GHG emissions savings achieved by PaMs (or groups of PaMs), both ex post (retrospectively) and ex ante (anticipated savings), as well as the projected and realised costs and benefits of the reported PaMs are provided, where available.
