

## Integrated national climate and energy policies and measures

Integrated national climate and energy 'policies and measures' (PaMs) cover all actions which contribute to meeting the objectives of the integrated national energy and climate plans. European countries are committed to adopting, implementing and planning policies and taking the corresponding measures to achieve climate change mitigation and energy targets, such as reducing greenhouse gas (GHG) emissions, producing additional renewable energy, or reducing overall energy consumption. All European countries report information on implemented, adopted or planned PaMs every 2 years under the Governance of the Energy Union and Climate Action Regulation and its two Implementing Regulations (EU) 2020/1208 and (EU) 2022/2299.
