

Weighted impacts of EU consumption, 2010-2020

This data has been calculated by EEA based on Eurostat consumption trend data, EXIOBASE and the Environmental Footprint (EF). The calculations summarize the level of consumption footprint in million points (the environmental and climate impacts that result from EU citizens' consumption) for EU27 member countries between 2010 to 2020, and the level of consumption footprint in points per capita (the environmental and climate impacts that result from EU citizens' consumption) for EU27 member countries in 2020 compared to 2010.
