

## Fatalities associated with flooding 1980-2022, Oct. 2023

This metadata refers to a vector dataset that shows the number of fatalities caused by annual flooding aggregated by country and at European level. The dataset covers the EEA-38 member countries over the period 1980-2022.

The dataset is part of the European Climate Adaptation Platform (Climate-ADAPT) accessible here:

<https://climate-adapt.eea.europa.eu/observatory/evidence/health-effects/flooding>

The data is based on the damage records from CATDAT of RiskLayer under a contract and with 'non disclosure' provisions.

Sources: Based on the damage records from CATDAT of RiskLayer
