

Percentage of of people 75 years old or older in the population (2014), Jan. 2019

This vector dataset shows the data of the number of people 75 years old or older in a number of cities across Europe. The data was obtained from Eurostat dataset of cities and greater cities and joined to the Urban Audit 2011-2014 cities' centroids.

Older people tend to be more affected by climate-related hazards, mainly heatwaves but also flooding. The number of older people and their poportion in the population should be considered in planning adaptation to climate change in order to design and implement appropriate actions.

Explanation	See the referenced specification
Statement	<p>This vector dataset shows the data on proportion of number of people 75 years old or older. Data was downloaded from Eurostat (Population on 1 January by age groups and sex - cities and greater cities (urb_cpop1; http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=urb_cpop1&lang=en)) and joined to the Urban Audit 2011-2014 cities' centroids (https://ec.europa.eu/eurostat/web/gisco/geodata/reference-data/administrative-units-statistical-units/urban-audit#ua11-14) .</p>
