

Copernicus Border Expert

The Copernicus Border Expert product covers EEA38 member countries and the United Kingdom (former EEA39) in vector - and raster formats, including the French DOM (Saint-Barthelemy BL, Saint Martin MF, French Guiana GF, Guadeloupe GP, Martinique MQ, Mayotte YT and Reunion RE) as well as the Falkland Islands (FK). For the provision of land monitoring services within the Copernicus programme, a consistent, stable, sufficiently detailed boundary layer is required at EEA, which provides a "land mask" for the area that needs to be monitored.

The production of this EEA38 and United Kingdom Border Expert Product was coordinated by the European Environment Agency in the frame of the EU Copernicus programme.
