

## Elevation breakdown based on EU-DEM

This is the generalisation at 1 km resolution of elevation breakdown 100 m based on EU-DEM. The layers defines homogeneous areas as function of height, slope and distance to the sea. The Elevation Breakdown is used to allocate Land Cover Changes into homogeneous areas as function of height, slope and distance to the sea. It defines five relief typologies: 1) Low coasts, 2) High Coasts, 3) Inlands, 4) Uplands and 4) Mountains.
