

## Percentage of lone-pensioner households (2014), Jan. 2019

This vector dataset shows the data on proportion of households that are lone pensioner households. Data has been downloaded from Eurostat and joined spatially with the Urban Audit 2011-14 city centroids, also downloaded from Eurostat.

Older people living alone tend to be more vulnerable to climate-related hazards such as heatwaves or flooding than the population on average. Considering the type of households in the city, including the proportion of vulnerable households, is an important aspect of planning of adaptation to climate change.
