End date	2003									
Additional Information	The database began under the Corine biotopes project to enhance reliable and accessible information about vulnerable ecosystems, habitats and species of important as background information for Community environmental assessment. The original documentation of the dataset and its compilation is available in the following report: CORINE Biotypes - The design, compilation and use of an inventory of sites of major importance for nature conservation in the European Community. Also, the data collection is described in this report: CORINE Biotopes Sites - Database Status and Perspectives 1995.
