

Invasive Alien Species reporting under EU Regulation 1143/2014, 2015-2018

This metadata refers to the information and data related to the first reporting under the EU Regulation 1143/2014 on invasive alien species (IAS).

The data contains the reported spatial gridded distribution information for IAS of Union concern (10 km grid cells) from 24 Member States and United Kingdom. Three Member States (Greece, Romania and Portugal) did not deliver spatial data in the agreed format. The data contains information on Invasive Alien Species (IAS) of Union concern included in the relevant Union List and on Invasive Alien Species of Member State concern. The provision of information on spatial distribution of IAS of Member State concern was optional.

All Member States are requested by EU Regulation 1143/2014 to report every 6 years on the IAS of Union, of regional and of Member State concern and to provide information on cross-cutting issues of the implementation of the Regulation.

Explanation	See the referenced specification
Statement	<p>The core of the IAS Regulation is the list of Invasive Alien Species of Union concern. Access to the Union list: https://ec.europa.eu/environment/nature/invasivealien/list/index_en.htm.</p> <p>For information about the species currently included on this list (https://ec.europa.eu/environment/nature/invasivealien/docs/KH-04-20-414-EN-N.pdf)</p> <p>The IAS Regulation provides for a set of measures to be taken across the EU in relation to invasive alien species included on the Union list. Three distinct types of measures are envisaged, which follow an internationally agreed hierarchical approach to combatting IAS:</p> <ul style="list-style-type: none">* Prevention: a number of robust measures aimed at preventing the intentional or unintentional introduction of IAS of Union concern into the EU.* Early detection and rapid eradication: Member States must put in place a surveillance system to detect the presence of IAS of Union concern as early as possible and take rapid eradication measures to prevent them from establishing.* Management: some IAS of Union concern are already established in certain Member States. Concerted management action is needed to prevent them from spreading any further and to minimize the harm they cause. <p>Access to dataset- and table definitions: https://sdi.eea.europa.eu/webdav/continental/europe/natural_areas/invasive_species/eea_v_3035_10_km_ias-regulation_p_2015-2018_v01_r00/Documents/</p>
