

Total annual use of water (m³ per capita) with reference years between 2004 and 2012, Jan. 2019

This metadata refers to a dataset with the annual use of water measured in m³ per capita with data from 335 European cities. The measured values referring to years between 2004 and 2012. The data on the water consumption was obtained from Eurostat with city centroids from Urban Audit 2011-2014.

Many locations in Europe are already affected by droughts and water scarcity; for many of those, and other places, these phenomena will intensify and become more problematic in the future. Understanding the water demand in the city is important to comprehend the presence and scale of the water availability problem and adapt to it in the future (Tapai et al (2017), DOI: 10.1016/j.ecolind.2017.02.040)

Statement	Data on total use of water was obtained from Eurostat: 'Environment - cities and greater cities [urb_cenv]' (https://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=urb_cenv&lang=en) (EN3003V) was divided by the city's total population number, also from Eurostat 'Population on 1 January by age groups and sex - cities and greater cities [urb_cpop1]' (http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=urb_cpop1&lang=en) in order to calculate the water consumption per capita and joined to the Urban Audit 2011-2014 cities' centroids (https://ec.europa.eu/eurostat/web/gisco/geodata/reference-data/administrative-units-statistical-units/urban-audit#ua11-14). Various years were used in order to ensure the best spatial coverage.
