

## Approximated estimates for the primary and final consumption of energy

The Energy Efficiency Directive 2012/27/EU (EED) and amending directive 2018/2002/EU establish a common framework for the promotion of energy efficiency within the Union in order to ensure the achievement of the Union's target of 20 % reduction in energy consumption by 2020 and 32 % by 2030, and to pave the way for further energy efficiency improvements beyond that date. It also calls on Member States to set their own indicative national energy efficiency targets.

Since early access to the most recent information on energy consumption is relevant for all stakeholders, the EEA and its European Topic Centre for Climate Change Mitigation and Energy (ETC/CME) produce each year a set of early estimates concerning the consumption of primary and final energy in the previous year, across the EU as a whole and in each Member State. These estimates are compatible with the scope of the energy efficiency targets for 2020 and 2030, and they correspond to the indicator codes PEC2020-2030 and FEC2020-2030 from Eurostat.
