

## Population affected by forest fires 2000-2018, Jan. 2020

This vector dataset shows the total population of a series of European cities (included in Urban Audit) living within areas burnt by forest fires between 2000 and 2018.

The areas burnt between the beginning of 2000 and the end of 2018, obtained from the European Forest Fire Information System-EFFIS by the Joint Research Centre (JRC) were merged together and overlaid with the GEOSTAT 1km2 population grid from 2011 from Eurostat.

IMPORTANT NOTE: Due to the restrictions of access and use of GEOSTAT 2011 dataset, this data cannot be disseminated outside EEA.
