

Ratio of percentage of urban green space between administrative units in Q5 (top 20%) and Q1 (bottom 20%) of proportion of people over 65, 2020

This metadata refers to the vector dataset presenting, at EEA38 member country level for 2020, the ratio of the average urban green space between urban administrative units containing population with the highest percentage of people over 65 years old (top 20% or 5th quintile) and the administrative units containing population with the lowest proportion of people over 65 years old (bottom 20% or 1st quintile) in a given country. The data sources behind the dataset are the 'EEA Percentage of population over 65 years (2020), Nov. 2021' and the data contained in the EEA 'Urban green Infrastructure, 2018' dashboard.

The temporal coverage of the data is: 2018/2020 (green space data is from 2018; the socio-economic data is from 2020, gap filled).

The data is included in the European Climate and Health Observatory: <https://climate-adapt.eea.europa.eu/observatory>. The European Climate and Health Observatory platform provides easy access to a wide range of relevant publications, tools, websites and other resources related to climate change and human health.

The EEA 'Urban green Infrastructure, 2018' dashboard has been developed based on: "Green Infrastructure Elements in the urban and commuting zones in 2018 - version 1, May 2021".

Conformance result

Title	Commission Regulation (EU) No 1089/2010 of 23 November 2010 implementing Directive 2007/2/EC of the European Parliament and of the Council as regards interoperability of spatial data sets and services
Date (Publication)	2010-12-08
Explanation	See the referenced specification

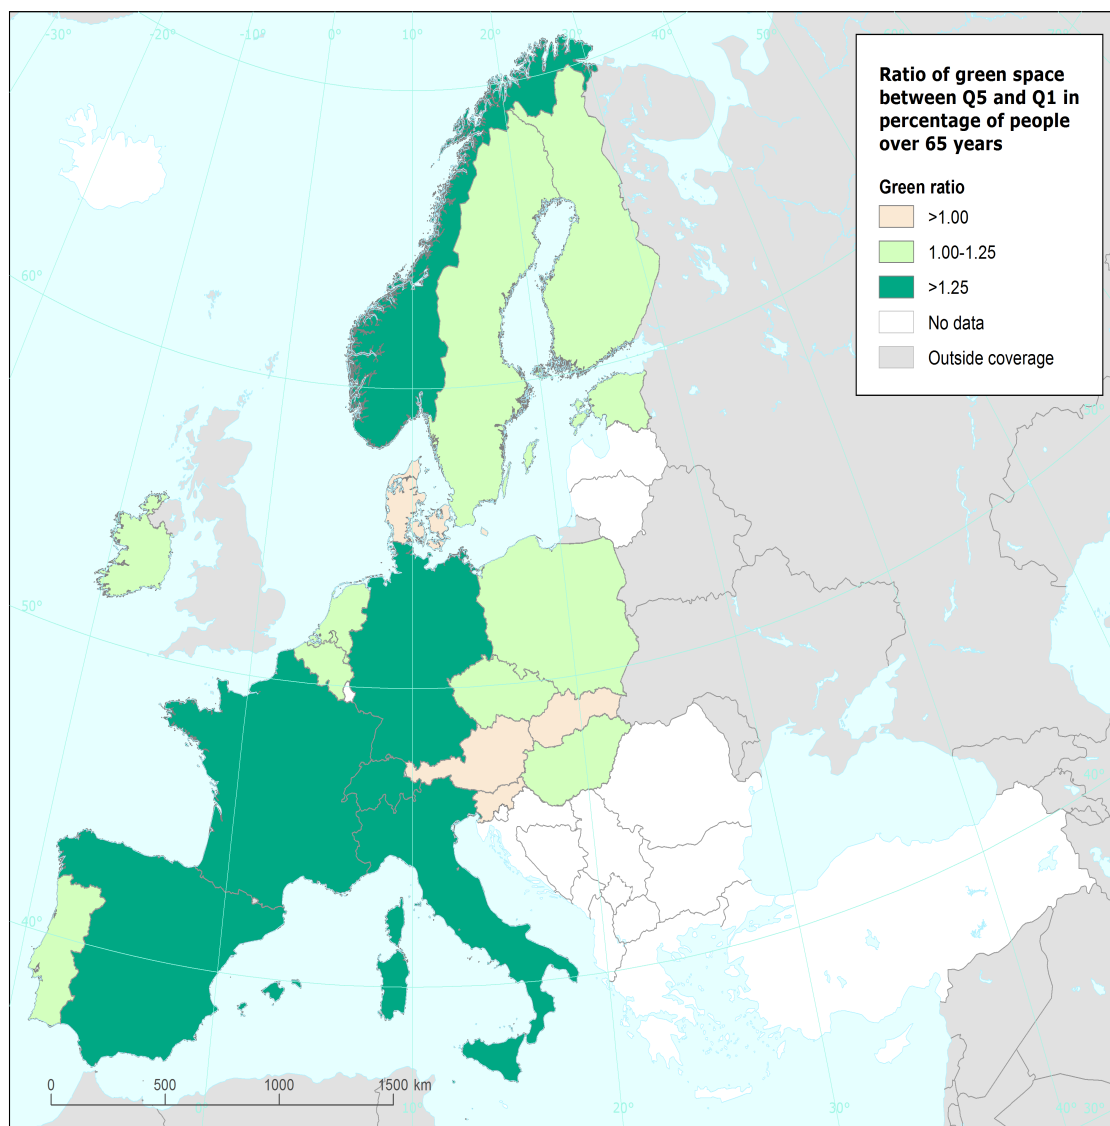

Statement	<p>The administrative units within Functional Urban Areas in each country were classified into 5 quintiles considering the percentage of people over 65 years old. For each quintile, the average (mean) percentage of the administrative unit area that is classified as urban green space was calculated. The mean percentage of the administrative unit area that is classified as urban green space in the 5th quintile of percentage of people over 65 was divided by the mean percentage of the administrative unit area that is classified as urban green space in the 1st quintile of percentage of people over 65 to obtain the ratio.</p> <p>The sources that underpin the dataset are: "Percentage of population over 65 years (2020), Nov. 2021" (https://sdi.eea.europa.eu/catalogue/srv/eng/catalog.search#/metadata/2b345477-33df-491f-be4d-743bcdcf7274) and the data contained in the EEA 'Urban green Infrastructure, 2018' dashboard (https://www.eea.europa.eu/data-and-maps/dashboards/urban-green-infrastructure-2018).</p>
