

## HELCOM marine protected areas 2010 (vector) - version 1, Mar. 2013

This dataset is compiled from data submitted by HELCOM Contracting States. It includes the borders of designated Baltic Sea Protected Areas. The designation is based on the HELCOM Recommendation 15/5 (1994). During 2009-2010 the data was up-dated within a project to analyse the ecological coherence of the HELCOM protected areas network. The current version of the dataset was created updating an older version of the BSPA shape file. New shapes were supplied by the Contracting States. The dataset was created in the scope of the assessment on the ecological coherence of the Baltic Sea MPA networks. Results are published in "HELCOM 2010. Towards an ecologically coherent network of well-managed Marine Protected Areas – Implementation report on the status and ecological coherence of the HELCOM BSPA network. Balt. Sea Environ. Proc. No. 124B". The Attribute "Site ID" has to be used to link the data to the HELCOM BSPA Database.

### Conformance result

Title	Commission Regulation (EU) No 1089/2010 of 23 November 2010 implementing Directive 2007/2/EC of the European Parliament and of the Council as regards interoperability of spatial data sets and services
Date (Publication)	2010-12-08
Explanation	See the referenced specification

Statement	In March 2013, the latest version of the dataset was downloaded from the HELCOM website by ISPRA (Rome, Italy), to be used in the frame of the Spatial analysis of Marine Protected Area Networks in Europe’s seas project, coordinated by the European Environment Agency (EEA) in 2013-2014. The metadata were provided by HELCOM in January 2014, after a request of information. HELCOM published an updated version in July 2013.
