

Urban Atlas

The Urban Atlas provides pan-European comparable land cover and land use information for the selected Functional Urban Areas (FUA) in Europe and the United Kingdom.

The product has a six years update cycle and is available for the 2006, 2012 and 2018 reference years including the change layers.

For the 2012 and 2018 reference years a derived from FUAs separate street tree layer is available, and for the 2012 reference year the product suite is complemented with Building Height layer.

The Urban Atlas is a joint initiative of the DG REGIO and the European Union's Copernicus Land Monitoring Service.
