

## WISE Water Accounts for Europe

The WISE Water Accounts database contains 1) monthly water accounts for the years 1990-2015 for 117 European river basins extracted from the ECRINS functional river basin districts. The WISE Water Accounts database holds also 2) The Water Accounts Spatial Units dataset which is an extraction of the European catchments and Rivers network system (ECRINS), aggregation catchments and reference layers. It contains 117 river basins extracted from the ECRINS functional river basin districts (EcrAgg). The Ecrins river basin districts are delineated according to the hydrological thresholds and do not necessarily follow administrative boundaries. The main purpose of the data set is to display the EEA water accounts outputs at the river basin level.
