

## European Maritime Transport Environmental Report 2021 - underpinning datasets

This is the underpinning data that has been prepared in the context of the development of the first European Maritime Transport Environmental Report. The following topics are covered:

- \* Vector dataset representing the benthic broad habitat types in Europe seas potentially affected by anchoring
- \* Vector dataset represents the benthic broad habitat types in Europe Seas potentially affected by the ship wakes.
- \* Vector dataset containing the main European ports
- \* Raster dataset representing the probability of occurrence of whales in the Europe Seas
- \* Raster dataset representing the risk of collision of whales with vessels in Europe Seas.
