

In this folder the uploaded reports / report parts contain the following:

Updated crosswalk of the revised EUNIS Habitat Classification with the European vegetation classification and indicator species for the EUNIS grassland, shrubland and forest types

Report EEA/NSS/17/002/Lot 1. Published April 2019

Processing European habitats probability maps for EUNIS Forest (T), Heathland, scrub and tundra (S) and Grassland (R) habitat types based on vegetation relevés, environmental data and Copernicus land cover

ETC/BD Technical paper in collaboration with EEA, published December 2019

Distribution and habitat suitability maps of revised EUNIS grassland, heathland, scrub, tundra and forest types

Report from ETC/BD to EEA published December 2018

Description and distribution of revised EUNIS heathland scrub and tundra

This is an extract from the report: Review of grassland habitats and development of distribution maps of heathland, scrub and tundra habitats of EUNIS habitats classification (Report EEA/NSV/15/005), published June 2016, and it contains the following chapters and Appendixes:

- 4 Description and distribution of the revised EUNIS heathland, scrub and tundra habitat types**
 - 4.1 Background
 - 4.2 Indicator species of the revised EUNIS heathland, scrub and tundra habitat types
 - 4.3 Update of indicator species of the revised EUNIS woodland habitat types
 - 4.4 Description in a standard format of the revised EUNIS heathland, scrub and tundra habitat types
 - 4.5 Maps of distribution of phytosociological relevés and probability of occurrence based on distribution models for each of the revised EUNIS heathland, scrub and tundra habitat types

Appendix E: Formal definitions of heathland, scrub and tundra habitat types used in the expert system

Appendix F: Lists of indicator species of the revised heathland, scrub, and tundra habitat types

Appendix G: Descriptions of revised EUNIS heathland, scrub and tundra habitat types

Appendix I: Preliminary distribution and suitability maps of the revised EUNIS heathland, scrub and tundra habitat types

Description and classification of revised EUNIS heathland scrub and tundra

This is an extract from the report: Vegetation analysis and distribution maps for EUNIS habitats (Report EEA/NSV/14/006), published January 2015, and it contains the following chapters and Appendixes:

- 2 Description and classification of EUNIS heathland, scrub and tundra habitats on the basis of in situ vegetation measurements throughout Europe – Task 1**
 - 2.1 Background
 - 2.2 Vegetation-plot data as a scientific basis for habitat classification
 - 2.3 Update of crosswalks between EUNIS heathland, scrub and tundra habitats and EuroVegChecklist
 - 2.4 The floristic composition of EUNIS heathland, scrub and tundra habitats at the level of alliances of the EuroVegChecklist
- 3 Reviewing the EUNIS heathland, scrub and tundra habitats – Task 2**
 - 3.1 Background
 - 3.2 Review of the EUNIS heathland, scrub and tundra habitats
 - 3.3 Proposed changes in the EUNIS heathland, scrub and tundra habitats

Appendix A: An updated crosswalk EUNIS heathland, scrub and tundra habitat types (B1.5, B1.6, B2.5, F) to the 2013 EuroVegChecklist syntaxa

Appendix B: An updated crosswalk Syntaxa to EUNIS heathland, scrub and tundra habitat types (B1.5, B1.6, B2.5, F)

Appendix D: Fact sheets EUNIS heathland, scrub and tundra habitat types

Preliminary suitability maps for heathland scrub and tundra

This is an extract from the report: Review of grassland habitats and development of distribution maps of heathland, scrub and tundra habitats of EUNIS habitats classification (Report EEA/NSV/15/005), published June 2016, and it contains the following chapters and Appendixes:

Appendix I: Preliminary distribution and suitability maps of the revised EUNIS heathland, scrub and tundra habitat types
